# Nunn Consulting & Project Engineering

**We Deliver Your Success**

"If you think it's expensive to hire a professional to do the job, wait until you hire an amateur."

- Red Adair

## Why are NCPE different?

NCPE like to think of it as "virtual engineering". We would not generally be permanently present on site for the duration of the project. Most of the work would be activated either at the client's office or other such suitable office facilities suiting the convenience of all parties. Part of NCPE's function would include provision for site visits such as, site assessments, audits, validation of works performed etc.

## We Deliver Your Success

To be most efficient, clients will benefit from engaging the services of NCPE right from the start of the project to review and expose all risks at the earliest opportunity using HAZOP studies, 1-3 for project justification/ validation. NCE's involvement in early scheduling execution will identify when you, as the client, are likely to need particular attention to high risk areas of the project schedule:

*We fill the gap, minimizing client risk and maximizing value for money, ensuring you as the client get what you expected and paid for.*

## What's your risk?

- Cost blow out
- Schedule blow out
- Project out of control
- Lack of technical guidance
- Poor contract management
- Constructability issues
- Poor reporting
- Lack of appropriate procedures
- Lack of statutory compliance/ guidance
- Not meeting KPI's
- Lack of value engineering
- Lack of adequate risk management
- Variation & claims out of control

## NCPE Vision:

*To be regarded as a leading consultancy delivering value for money project delivery methodologies to clients throughout the project life cycle, ensuring minimal client exposure to risk.*

## NCPE provides three primary services:

### Owner's representative services:

NCPE can provide technical expert advice for owners to ensure that the project life cycle process follows the plans and specifications.

### Pre-Construction Services:

NCPE can review plans and specifications and advise clients of potential risks prior to the commencement of construction.

### Contractor Management On Site Support:

NCPE can provide on-site services during the project to ensure that the construction is built as "fit for purpose" and in accordance with company & statutory requirements.
